

# STEAM BOOK CLUB

## ABOUT THE PROJECT

Traditional stories and fairy tales are a great way to start your reading practice. With our “STEAM Book Club” eTwinning project, we aim to inspire English learners to discover the fun of reading and build a lifelong love of reading.

With STEAM activities inspired by the story books, our students will undoubtedly have the opportunity to improve themselves in the fields of science, technology, engineering, art and mathematics.

In short, we aim to encourage our students to read or listen to English stories, helping them learn a second language in a way that is not only fun but also memorable.

## WORK PROCESS

Each month, we will read a story book inspired STEAM ( Science, Technology, Engineering, Art & Math) activities that are perfect for elementary-school aged kids.

## EXPECTED RESULTS

At the end of the project, young English learners will gain confidence to read and write independently, use comprehension skills effectively and look for clues to answer questions. We highly expect that our pupils will improve their literacy skills and learn how to express their personal opinions about things they have read.

## PROJECT MEMBER COUNTRIES

Poland, Hungary, Portugal, Malta, Italy, Macedonia, Georgia, Albania, Lithuania, Romania, Czech Republic, Ukraine and Turkey.
