ADVENTUROUS LEARNERS

ABOUT THE PROJECT

Did you know that outdoor learning can be an enrichment for pupils and enable them to learn beyond the borders of their classroom?

We truly believe some of the most valuable learning experiences come from an opportunity to move, explore, discover and create. Our project aims to introduce the environment like a school and give the opportunity to pupils to go back to nature. Playing and learning outside also help pupils to understand nature, the interdependence of plants and lifecycles. What's more, it's only natural we should look to the outdoors for learning during the pandemic. Outdoor space allows for social distancing and provides much-needed fresh air. All in all, discovering nature as an educational atmosphere will be fun!

THE AIMS OF THE PROJECT

- To support successful primary school learning in a variety of environments.
- To explore the natural world.
- To discover the seasons, animals, insects, habitats, and so much more.
- To play an important role in the foundation of science.
- To provide a safe and supportive setting to enhance social skills.
- To make students aware of other cultures.
- To promote the use of ICT among pupils and teachers.
- To improve English Language.

WORK PROCESS

Each month, partner schools will have a task that need to be accomplished within a defined period of time to work towards the project-related goals.

Project activities break down into 6 main categories.

October: Planting
November: 1st Online Meeting
December: Art Outside
January: Science Outside
February: Maths Outside
March: 2nd Online Meeting
April: Play Outside
May: Literacy Outside
June: 3rd Online Meeting

EXPECTED RESULTS

As a result of the project, the pupils who learn outdoors will have signaficantly less stress, reduced ADHD symptoms, lower rates of physical and emotinal illness, but more resourcefulness and creativity.

PROJECT MEMBER COUNTRIES

Turkey, Ireland, Romania, Macedonia, Albania, Poland, Georgia, Czech Republic and Greece.
